

OPERATIONS PLANNER

Salvia BioElectronics, High Tech Campus 37, Eindhoven, The Netherlands

ABOUT US

We are Salvia: an innovative startup active in the emerging field of bioelectronics. We derived the name Salvia from the Latin word *salvere*, which means to stay healthy. In addition, the Salvia-herb has been used to treat headaches and pain for centuries. Our mission is to give migraineurs back their life. Salvia is ambitious: we want to provide drug-free solutions that are effective and inherently side-effect free and make our novel solutions widely accessible.

THE CHALLENGE

We offer a challenging position for an operations planner. You ensure a smooth planning process across the supply chain from shopfloor up to leadership level. You ensure planning, production, cleaning, maintenance, people and communicate with the relevant stakeholders inside Salvia and with our OEM suppliers. You take into account all relevant constraints like lead-time, production capacity, expiry dates, required training level, etc. You minimize the impact of operational issues by adapting the plan accordingly. You are part of a small but growing operations team.

RESPONSIBILITIES

- Production planning of materials, equipment and people from daily operations to a yearly operations plan. Taking into account all constraints like component lead times, training, shelf life, maintenance, ...
- Detailed production planning with multiple OEM suppliers, incl. managing of critical components at suppliers.
- Prepare Demand & Operations planning. Aligning plan with relevant stakeholders within the organization (clinical, development) and our inhouse manufacturing and outsourced manufacturing partners.
- Equipment planning: corrective & preventive maintenance, internal & external calibration, infrastructure (cleanroom).
- Integrating inhouse production plans, OEM plans, equipment plans in a master production schedule.

YOUR PROFILE

- Minimum Higher Vocation Education degree (HBO)
- Operations mindset, getting things done, daily management
- 5+ years working experience in planning
- Strong communication skills, common sense
- Experience and affinity with lean planning tools in excel
- Enjoying the puzzle of making a planning work
